

Rethinking Staff Communications

Features and Benefits

- Streamline workflow with IntelliBlast™ two-way staff communications
- Improve compliance with automatic license expiration reminders
- Automate shift fulfillment with real-time response capture
- Manage costs by specifying nurse-type and controlling overtime
- Adjust staffing based on patient acuity and census changes
- Improve company morale, recruitment and retention
- Document communications for your company

Today, cost reductions, increased efficiencies and improved outcomes are of utmost to healthcare facilities.

The revolutionary YourNurseIsOn.com (YNIO)™ communications platform can help you achieve these goals by streamlining workflow and improving resource allocation.

Boost Productivity and Compliance

- **Click:** YNIO instantly sends vacant shift notifications and important company messages.
- **Contact:** YNIO utilizes patent-pending IntelliBlast™ technology to provide targeted, instant, two-way staff communications by phone, text and email.
- **Confirm:** YNIO's intelligent communications platform captures real-time responses to automate shift fulfillment.

Right People, Right Places, Right Now!

YNIO is convenient, maintenance free and user-friendly. The web-based, *Software as a Service* (SaaS) product has no software to install or maintain. With unlimited licenses, your staff has access wherever and whenever they need it.

With YNIO, your resources are allocated more effectively, resulting in improved staff morale, reduced costs and better patient outcomes.

YNIO Uses

- **Targeted Resource Allocation**
Instantly contact the right staff on their preferred device(s) for efficient resource allocation.
- **Company Communications**
Easily communicate license expirations, consensus requests, compliance information or emergency messages.
- **Documentation and Reporting**
Quickly view and print reports on *Blast Message*, *Assignments* and *Usage Summary* for analysis and compliance.
